EDUCATION

CUNY Brooklyn College

May 2025

B.S. Computer Science | GPA: > 3.5

Honors and Awards: Dean's list, ASME Inspire

Relevant Coursework: Data Structures and Algorithms, Design and Implementation of Large-Scale Apps, Discrete Structures, Networks and Protocols, Intro to Databases, Modern Java Techniques, C++ Programming, Intro Python

TECHNICAL SKILLS

Programming languages: Javascript, HTML/CSS, TypeScript, Java & C++ & Python (Familiar from coursework)

Frameworks and Development Tools: React, Vite, TailwindCSS, TanStack, Vitest, Firebase, NodeJS, ExpressJS, Redis, Github, MySQL, Postgresql & Prisma, OpenCode & Codex.

Projects

Project 1: Haircut App (In Production) | *Full-Stack*

- Achieved Firebase role-based authentication with idempotency.
- Deepened understanding of JWT refreshing and password hashing.
- Learned Redis and caching rate limits per user.
- Implemented WebWorkers with Google's MediaPipe task-vision.

Project 2: College Invaders | *Backbone, UI/UX & Code Maintainer*

Link: <https://tzebohn.github.io/collegeinvaders/>

- Developed the ability to take initiative and contribute proactively.
- Built foundational knowledge of using Version Control Systems, specifically Subversion, in a large team environment.

Project 3: Stock Scanner | *Full-Stack*

- Developed the ability to design and structure my own MySQL Database.
- Learned various data request methods: linear, batching and using p-limit.
- Learned about deadlock issues during intensive CRUD operations.

Project 4: Restaurant Generator | *Backend*

Link: <https://github.com/exile1217/CISC-4900>

- Gained an understanding of how APIs (Yelp Fusion) and pagination works.
- Became more comfortable working collaboratively in a team environment.

Project 5: MessageBoard | *Full-Stack*

Link: <https://odin-message-board-3i88.onrender.com>

- Learned how to deploy on AWS and integrate it with a backend on Render.
- Learned and implemented WebSockets.
